

COPPER STONE<sup>®</sup>

*Bath Fixtures*

**Perfection** at its best

## WHO WE ARE

The Company began as a small workshop with the goal of challenging the industry status quo dominated by historic names. Armed with a clear vision of change and innovation, the Copper Stone family has pioneered new, ground-breaking business philosophies managing to quickly develop into one of the most sophisticated and vertically integrated manufacturing company in its product category across the country with a brand that has become synonymous with superior design.

The original workshop was already abandoned by 2017 in favour of a modern facility. The production facility, the systems and the entire production process have been designed and manufactured with special focus upon efficiency and worker safety. Innovative solutions have been adopted in order to achieve these objectives.

Copper Stone's "Made in India" bathroom products and accessories are manufactured in harmony with the utmost respect for the environment and the user, creating a new awareness and appreciation of bathroom design, and focussing upon the objects' charm and elegance, as well as their ethical content. Copper Stone bathroom products enjoy an extraordinary client base of architects, interior designers, and lifestyle enthusiasts... outgoing, creative, dynamic, and innovative individuals, who like to think outside the box inventing the future.

# QUALITY

The Integrated Quality Management System governs the entire business and is dedicated to its continuous improvement.

Copper Stone not only boosts quality and product conformity certificates, but has also placed quality checkpoints at every stage, right from the raw material to the plating plant. Copper Stone has never waned in pursuit of its total quality concept, which is not merely adhering to standards and regulations. Rather it is a shared value and a central indispensable element that reflects the Company's business philosophy and translates into a real commitment in every aspect of the business, from products and processes to relationships with its partners and suppliers, always dedicating special attention to the environment.

Copper Stone strives to be a "special" workplace designed to be efficient, but above all pleasant, comfortable and beautiful, as well as respectful of the workers and the environment in all of its aspects.

Think outside of the box  
inventing the future
