Matte Finish

MAY YOUR HOME
HAVE YOUR
SPECIAL TOUCH,
WHILE ALSO
STAYING
SPOTLESS.

Every aspect of your home should reflect your own special touch. And yet, feel invisible and natural. Which is why, our Anti-Fingerprint Plus collection has specially created surfaces that can stay spotless even when there is high usage.

They make your mark – without leaving a mark.

THE ANTI-FINGERPRINT PLUS ADVANTAGES

Every Anti-Fingerprint Plus surface comes with a host of highly desirable inherent features such as velvet touch, scratch resistance and, of course, fingerprint stain resistance.

The surface also creates almost zero-reflection and is high-matt – which is fast becoming a global and international preference.

Furthermore, all it takes to maintain it for years is to wipe it with a damp cloth and a little dish soap.

If the dirt is more stubborn, a melamine sponge should help.

Available in 1.25MM thickness.

First impressions are essential to retail and commercial spaces. Which is why, in order to make your interiors look sharp and smart, you need Monocore. High pressure laminates often cannot offer joints that look concealed; however, Monocore ensures that the edges between two laminates always blend smoothly. Its range of high colour designs infuse material throughout its thickness, entirely eliminating the shadow line effect that can cramp your style.

What's more, you can choose from 9 contemporary shades as well as two kinds of finish: Gloss and Suede.

PRODUCT COMPOSITION

High quality Monocore laminates are special in that they have the identical colour decorative surface as their core layer, making the shade uniform – even around the edges.

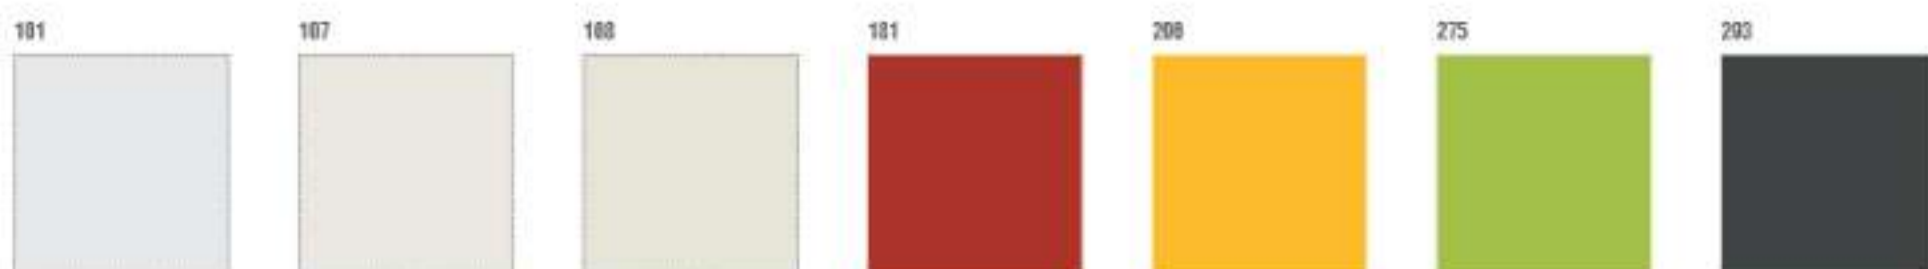

The use of very unique technology helps make Monocore laminates so premium. Made of a single design paper, the reverse is sanded. Melamine resins are used to treat the decorative side, while special resins impregnate the core paper layer, causing the laminate sheet to maintain uniform colour on the edges.

CARE & MAINTENANCE

Making your laminates continue to look stunning for a long time is both simple and easy.

Our laminates are designed to look stunning for years. A few simple procedures will help them stay that way for longer.

One question that's always on a homeowner's mind is, "After having redecorated my home, how do I take care of the laminates without much hassle?"

It's easier than you'd think, actually. Usually, all it takes is a swipe of a damp cloth or sponge. Even with just a dry soft cloth, you can ensure that dust doesn't settle on the surface.

CenturyLaminates are built to last and look great for years and years – after all, they are built to resist dirty fingerprints, coffee spills and much more.

However, should the rare and inadvertent occasion occur where they need further care, the simple care & maintenance procedures given below are sure to help.

QUICK CARE & MAINTENANCE TIPS

Do not place heated surfaces on the laminates, such as frying pans etc. Keep them away from heat generating appliances.

Sharp objects like knives and keys may cause accidental scratches. Use chopping boards or some other protective surface instead.

Wiping with a damp cloth or sponge soaked in mild soap detergent is more than enough to keep the surfaces clean.

For deeper stains, such as coffee or tea, massage the surface with a soft-bristled toothbrush soaked in mild household cleaner or a detergent, until the stain disappears.

Do note that acidic or abrasive cleaners are best avoided – they may cause harm.

Harsh chemicals that are found in toilet cleaners can cause permanent damage. If spilled onto a surface, wipe it off immediately and then wash with soapy water and rinse several times.

Only when a stain is severe, cleaning with a paste of baking soda and water, applied with a soft-bristled brush, is recommended. A maximum of 20 strokes should suffice – any more might damage the surface.

Do not place abrasive steel wool or pads on the surfaces, or even clean with them as they may deposit rust stains or scratch the surface.

Permanent stains can be caused by dyes, such as those used for hair, textiles and foods. If any should inadvertently spill, please wipe the surface immediately with a dish-washing detergent or an all-purpose cleaner.
