DAZZLING
Designs

At Virgo, quality is of utmost importance and we maintain the same in all the business heads of ours. We never compromise on quality and that is why we are recognized as indisputable leaders of laminate, plywood, aluminum, PVC and ACP. Apart from our adherence to quality, our 25 years long experience trail helps us deliver unmatched products to our customer. Be it laminate, plywood or aluminum products, for us, customers satisfaction is a barometer of our progress. In fact, we also focus on the overall development of society by favouring sustainable development. We are equivalently concerned about the environment, so we produce eco-friendly products that do not harm nature. We always stick to our ethos, value system, and professionalism that fuel our spirit to serve the finest quality products. This is applicable in each and every stage of the manufacturing process. Right from picking up the raw materials to serving the final product, we observe all the standards of quality and safety due to which, today, we have earned the market recognition of highest producer and exporter of laminates. We aspire to hold this position for many more years to come by keeping on innovating and serving exactly the right products.

3000+ Employees | 30+ Years of Expertise | Over 42+ Branches | 04 Overseas Branches

469+ Distributors Channel Nodes | In access of 22000+ retail outlets across India | Production Capacity of 129+ Million sq.mtr. Laminates Annually

20000+ Architect Interior Designers | 9700+ Network fabricators across India | 6 State of art factories

COMMITTED TO DELIVER SUPREME QUALITY

90° Bending Process / Steps

Laminates made with matching layers of colors throughout are called color core laminates. These laminate sheets are mostly used to eliminate the dark seams, which appear on the edges & joints of regular laminates. Color core laminates are known for the consistent, edgeless, and seamless look they give to furniture. Our color core range is available in Glossy and Matt finishes with a wide range of vibrant color options to choose from.

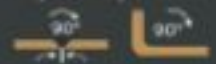

STEP-1

cut your sheets as per your desired dimensions

STEP-2

use v-groove cutter to mark a groove (to bend) on the sheet

STEP-3

next use a regular pair of scissors and trim the edge out

STEP-4

place the sheet front up and use the groove marks to bend the sheets towards outside

STEP-5

now your sheet is ready to be use

DIAMOND CUTTER BLADE

For cutting, routing and drilling, we only recommend using a diamond cutter blade. To avoid any burrs during cutting ensure all the blades are sharp. A smooth file can be used to feather all the corner edges.

CIRCULAR SAW BLADE

A 4"x8mm x 6 Tee Radius C - groove blade should be used for bending Virgo PVC laminates. The recommended groove depth is 0.8 mm & width 5 mm or more. Routed sheet will easily bend up to 90°.

Actual Sheet Thickness

Disclosure - Sample Thickness

Laminates made with matching layers of colors throughout are called color core laminates. These laminate sheets are mostly used to eliminate the dark seams, which appear on the edges & joints of regular laminates.

ADVANTAGES WITH VIRGO PVC

Laminates made with matching layers of colors throughout are called color core laminates. These laminate sheets are mostly used to eliminate the dark seams, which appear on the edges & joints of regular laminates. Color core laminates are known for the consistent, edgeless, and seamless look they give to furniture. Our color core range is available in Glossy and Matt finishes with a wide range of vibrant color options to choose from.

● THICKNESS -

1.2mm, +- 10% Standard

● SHEET SIZE -

1220mmx2440mm [Standard]

● SIZE OPTION -

Length - Any [On Request]
Width - Upto 1220mm

● RANGE -

Our PVC Laminates are available in a variety of range. Customized sizes & shades can be developed on request.

● ADHESIVE -

These laminates are easy to apply with the standard laminating system, including most of the conventional adhesive normally used with plastic laminates such as many water based and solvent based. We do not recommend the use of heat activated adhesives.

● LAMINATION -

Proper substrates must be used and careful bonding procedures must be observed. Substrates should be of good quality plywood, high density particle board, high Quality Fiber board, or PVC board. The face of the substrates must be smooth and free of grease, wax, dust, chips and other foreign matter.

We do not recommend use of PU base, Melamine, lamination (wax) on our laminates. The application of these will spoil the originality and natural beauty of the High Gloss PVC Flexible Sheets.

● CUTTING & INSTALLATION -

These High Gloss PVC Flexible Sheets can be cut, routed and drilled with most standard wood working too, or equipments. All blades must be sharp to remove any burrs that may occur in the cutting process. We recommend the use of a leather to smooth all corner edges.

● BENDING AND FORMING -

These laminates can be bent and all radius bending should be handled in the same manner as all grades of non post forming decorative laminates.

Use only V-Groove cutter to bend the sheets at 90 degree. In case of any difficulty please contact us.

● MAINTENANCE -

Any cleaning agent containing acids, alkalis or abrasive should not be used to clean the High Gloss Flexible Sheets. We recommend to use only clean water for cleaning of sheets.

Note: Virgo warrants that all its products are free from manufacturing defects and perfectly ideal for use in normal conditions. In case of any claim, the liability of the company is only limited to the cost of the product only. These may be color variations from batch to batch. The sample swatches in the catalogue represents the designs, colours and ruches. They do not represent the Actual sheet.

KINDLY REMOVE THE PROTECTIVE FILM WITHIN 7 DAYS OF INSTALLATION OF LAMINATES.
